### [Synchronization of Fractional-order Chaotic Systems with ...](#)

This paper is devoted to the problem of synchronization between fractional-order chaotic systems with Gaussian fluctuation by the method of fractional-order sliding mode control. A fractional integral (FI) sliding surface is proposed for synchronizing the uncertain fractional-order system, and then the sliding mode control technique is carried out to realize the synchronization of the given systems.

fractional order chaotic systems with time-varying delays [34]. However, some other types of synchronization for non-identical structural time-delayed fractional order chaotic systems are still open problems. Motivated by the above discussion, the generalized synchronization of time-delayed fractional order chaotic
